

Seyan Kim : a singer-songwriter preserves memories in sound

Seyan Kim is a singer-songwriter who creates a snow-white musical landscape, blending a contemporary folk foundation with the atmospheric textures of ambient and glitch electronic sounds. By layering the warmth of acoustic instruments and the fluid movement of digital synths, she delicately captures themes of loss, recovery, and the memories of love, musically exploring the intersection where emotion meets technology. After debuting in 2021 under the moniker 'Se2', she began releasing music under her birth name with the release of her 2023 EP, *Back to my Bluegene*. In 2025, she was selected as an artist for the Dolby Atmos Accelerator Program. She subsequently released her EP *De the Trauma*, a project where she confronted personal trauma head-on and reassembled it into unique musical structures. The showcases for this EP were held at Veloso Hongdae and the Incheon Art Platform. Navigating the space between emotional warmth and sonic experimentation, Seyan Kim continues to document memories and feelings in her own distinct artistic language.
